Position: Software Developer

Hired as Full Stack Developer working on various projects. I.e.:

ITS - "**Intelligent Traffic System**". The System gives effective control over traffic and resolve jams, city transport and road accidents problems. Server side is mainly C# and for Front-End ASP.NET, Entity framework, LINQ, UI controls (DevExpress), JavaScript(JQuery, Boostrap.js, Backbone, etc.).

Agrostat - Another big project I am currently involved into is Statistical Solution for **Ministry of Agriculture and Food**. I was developing and later on leading the team responsible for Web based part of the project including Public site, Survey site, Responder site, Forum and Newsletter. Whole Solution is based on .NET, Web is ASP.NET MVC with E.F. Code First, Database is MSSQL. Lots of Web APIs with AJAX and JSON data processing. Big part of Front End is done with React js.

MOJO – Is my current project, that I`m leading developer and architect. It is a voucher platform written in .NET – ASP.NET Core with E.F. Core, Database is MSSQL. Using Enterprise layered architecture with repository. Front End is standard Razor with JQuery, datatables.js, bootstrap etc..

Meanwhile have worked on some projects including: PHP + Symfony + Doctrine + MySql, WordPress, Unity, etc...
